

Commence Enhances Social with RM 7.1 Release

Eatontown, NJ – July 16, 2019 --- Commence Corporation a leading provider of Customer Relationship Management Software (CRM) has announced a release date of September 16, for an enhanced version of its popular desktop software. The new version RM 7.1, includes several technical updates along with enhanced integration with social media sites.

- Compatibility -- Microsoft has continued to make modifications to their Windows 10 Operating System that often impacts the compatibility and performance of third party software programs like Commence RM. The new release, RM 7.1 has been enhanced to fully support these recent changes thereby ensuring the continued use of the product and its features without incident.
- Workgroup Expert Enhancement the Workgroup Expert feature monitors the data synchronization process to ensure that all users of the Commence workgroup are working with them most current and updated data. The tool is traditionally used by the Commence Database Administrator to monitor the performance of the workgroup. RM 7.1 has been enhanced to work with the latest updates in Windows 10, the Microsoft Office 365 Mail Server and GMAIL. This will enable those that use either of these environments to generate reports and utilize these mail server tools for distribution.
- **Social Integration** has been enhanced significantly in RM 7.1 and will enable end users to reach out and capture information about prospects and customers through the direct integration with top mainstream social media sites. These include Facebook, Twitter and Linked In. The integration allows you to search, link & launch contact profiles.
 - Search twitter by name
 - Link to contact's social profile
 - Launch contact's profile page
